Abyssal Colony

The abyssal colony was formed by Sir Cabirus a famous knight. It was composed of many races including that of Humans, Mountain Folk, Goblins, Trolls, and Lizardmen. The abyssal colony was meant to be a place where all virtues were to be united and respected as a common law. Where all virtues were followed, it was thought, only peace would be the result. Unfortunately, the leader of this doomed colony, Sir Cabirus, died in the recesses of The Stygian Abyss and with his death the peace within the colony collapsed. Fighting broke out and since many of the colony members had great quarrels with the other races, civil war took place. The remaining who survived, left the colony to return to their life on the surface. Some who had grown too attached to life underground refused to leave. Later, after the colony had been forgotten, The Stygian Abyss was employed as a prison where once put in, you were never allowed to leave. Some say this is a fate far worse then death. The Abyssal Colony was fully disbanded when a demon known as the Slasher of Veils was banished from the deepest
